Change to Corps of Engineers' annual day-use passes

LOUISVILLE, KY – United States Army Corps of Engineers' day-use passes nationwide are now valid for 12 months from the date of sale, so an annual pass sold in March 2005 will be valid until March 2006.

Before this year, passes were only valid for the calendar year in which they were purchased, so a pass bought in September was only valid through December.

New passes are not expected to be available before March 2005. The 2004 passes will remain valid until the 2005 passes become available.

The \$30 pass permits the holder and all accompanying passengers in the vehicle to use all boat launch ramps and designated swimming beaches at any Corps- operated recreation area for 12 months from the date of purchase, except at facilities within a fee campground and reserved exclusively for the use of campers.

Golden Age and Golden Access 50-percent discounts apply to the purchase of annual day-use passes.

-30-

The Louisville District civil works mission encompasses a 75,500 square miles of the Lower Ohio River Basin in Illinois, Indiana, Kentucky, Ohio and Tennessee. It operates 20 multipurpose lakes and 10 locks and dams. The District is also involved in real estate activities, flood control measures, regulatory activities and disaster response as well as mobilization readiness. The military support mission includes planning, design, construction and real estate activities for Army, Air Force and Department of Defense facilities in Kentucky, Indiana, Illinois, Ohio and Michigan.
