
**Record of Non-Applicability
Concerning the General Conformity Rule (40 CFR Part 51)**

Name of Project: Implementation of Training, Construction and Natural Resources Activities at the Ogden Local Training Area

Location: WEBER COUNTY, UTAH

Army guidance dictates that a Record of Non-Applicability be prepared for Federal Actions where proposed emissions are clearly *de minimis* in order to comply with the General Conformity Rule (40 Code of Federal Regulations [CFR] 51, Subpart W) and the National Environmental Policy Act (NEPA) (42 United States Code [USC] 4231 et seq.).

Conformity under the Clean Air Act, Section 176, has been evaluated for the Proposed Action in accordance with 40 CFR Part 51. The requirements of this rule are not applicable to this project because the Preferred Alternative location is within an attainment area for all criteria pollutants.

DAVID L. MOORE
Chief, Public Works - Environmental Division
88th Regional Support Command
United States Army Reserve

Date

Appendix C- Summary Tables

Programmatic Environmental Assessment - U.S. Army Reserve Ogden Local Training Area, Ogden, UT Air Quality Emission Estimates

Operational Sources	Actual Criteria Pollutant Emissions (tpy) ¹							GHG Emissions (CO ₂ e)		
	SO ₂	NOx	CO	PM ₁₀	PM _{2.5}	VOC	HAPs	CO ₂	CH ₄	N ₂ O
Stationary Sources										
Heating Units	0.029	4.722	3.479	0.365	0.365	0.264	0.092	5343	2.116	3.124
Mobile Sources

General Conformity <i>de minimis</i> Thresholds ³	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Notes:

¹-Lead is not a significant pollutant generated from this type of action. Any lead emissions generated from the proposed action have been included as part of the HAP emissions.

²-PSD thresholds apply only to stationary sources. Reference K.A.R. 28-19-350 and 40 CFR 52.21. Threshold is 25 tpy for total HAPs or 10 tpy for any individual HAP.

³-General Conformity *de minimis* thresholds do not apply to projects located within attainment areas. Ogden, UT is located within an attainment area for all criteria pollutants.

⁴-In lieu of site-specific information, the construction emission calculations have been based on scope of similar proposed air sources at other USARCs.
