Public Notice No.
LRL-2016-229-jea

Open Date:
24 Mar 2016

Close Date:
25 Apr 2016

Please address all comments and inquiries to:

U.S. Army Corps of Engineers, Louisville District
ATTN: Ms. Jane Archer, CELRL-OPF-S, Rm 752

P.O. Box 59

Louisville, Kentucky 40201-0059

Phone: (502) 315-6682

This notice announces an application submitted for a Department of the Army (DA) Permit, subject to Section 10 of the Rivers and Harbors Act of 1899 and Section 404 of the Clean Water Act:

APPLICANT: Louisville and Jefferson County Riverport
Authority
6900 Riverport Drive
Louisville, Kentucky 40258

AGENT: Redwing Ecological Services, Inc.
1139 South Fourth Street
Louisville, Kentucky 40208

LOCATION: In wetlands adjacent to an unnamed tributary of
Mill Creek, located on the north side of
Logistics Drive and the east side of Cane Run
Road in Jefferson County, Kentucky.

Latitude: 38-10-18.3366
Longitude: 85-53-09.0441
7.5 Minute Quad: LANESVILLE

PURPOSE: The purpose of the proposed fill is to construct
an industrial warehouse facility with associated
infrastructure known as part of the Riverport
Phase IV expansion.

PROJECT BACKGROUND: On May 11, 2005, DA Permit No. LRL-2004-1649 was issued for the discharge of fill material into 1.4 acres of emergent wetlands and 13 acres of forested wetlands a 132-acre project site known as the Riverport Phase IV development. Two extensions were granted to the original permit with the last extension expiring on December 31, 2015. Approximately 7.8 acres of wetlands that were authorized under the original DA permit have been logged and cleared but have not yet been filled. This public notice announces the proposed discharge of fill into these remaining 7.8 acres of wetlands. Impacts to all 14.4 acres of wetlands have been compensated for under DA permit LRL-2004-1649.

DESCRIPTION OF WORK: The applicant proposes to discharge approximately 25,000 cubic yards of clean fill material into 7.8 acres of wetlands for the construction of a warehouse facility and associated infrastructure on approximately 25 acres (Lot 3-2) as part of the Riverport Phase IV development.

AVOIDANCE, MINIMIZATION, AND MITIGATION MEASURES: Compensatory mitigation has already been completed for all wetland impacts. Compensatory mitigation included wetland restoration and preservation on a 90-acre tract adjacent to Mill Creek and Black Pond Creek, as well as the purchase of 9.3 acres of wetland credit from PTRL Wetland Mitigation Bank. In addition, the applicant proposes to provide a 50-foot wide tree preservation buffer approximately 850 feet long across the northern boundary of the site. This includes 0.5 acre of forested wetland (50 feet wide by 440 feet long) in the central portion of the northern boundary that would be permanently preserved. It is noted that this proposed mitigation plan is open to comment and subject to change. The Corps will make a determination of appropriate mitigation, upon review of all submitted information.

REVIEW PROCEDURES: A DA Permit cannot be issued if any legally required Federal, State, or local authorization or certification is denied. A DA permit, if otherwise warranted, will not be issued until a State of Kentucky Water Quality Certification or waiver is on file at this office. In order to comply with Section 401 of the Clean Water Act, the applicant must apply for State certification from the Kentucky Energy and Environment Cabinet Division of Water (KDOW).

Copies of this notice are sent to the appropriate Federal and State Fish and Wildlife Agencies. Their views and comments are solicited in accordance with the Fish and Wildlife Coordination Act of 1956. Based on available information, the proposed activity will not destroy or endanger any Federally-listed threatened or endangered species or their critical habitats, as identified under the Endangered Species Act, and therefore, initiation of formal consultation procedures with the U.S. Fish and Wildlife Service is not planned at this time.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. A request for a public hearing must state the specific interest which might be damaged by issuance of the DA Permit.

The National Register of Historic Places has been examined, and it has been determined that there are no properties currently listed on the Register which would be directly affected by the proposed work. If we are made aware, as a result of comments received in response to this notice, or by other means, of specific archaeological, scientific, prehistorical, or historical sites or structures which might be affected by the proposed work, the District Engineer will immediately

Operations Division
Regulatory Branch (South)
Public Notice No. LRL-2004-1649-jea

take the appropriate action necessary pursuant to the National Historic Preservation Act of 1966 - Public Law 89-665 as amended (including Public Law 96-515).

The decision whether to issue a permit will be based on an evaluation of the probable impact of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered; among those are conservation, economics, aesthetic values, general environmental concerns, historic values, fish and wildlife values, flood damage prevention, land use, navigation, recreation, water supply, water quality, energy needs, safety, food production, and in general, the needs and welfare of the public. In addition, the evaluation of the impact of the activity on the public interest will include application of the guidelines (40 CFR Part 230) promulgated by the Administrator, United States Environmental Protection Agency, under authority of Section 404(b) of the CWA.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. It is presumed that all interested parties and agencies will wish to respond; therefore, a lack of response will be interpreted as meaning that there is no objection to the proposed project. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Written statements received in this office on or before the closing date will become a part of the official record and will be considered in the determination on this permit request. Any objections which are received during this period will be forwarded to the applicant for possible resolution before the determination is made whether to issue or deny the requested DA Permit. A permit will be granted unless its issuance is found to be contrary to the public interest.

Information pertaining to this application is available for public examination during normal business hours upon prior request. Drawings are available on Louisville District's Internet site at <http://www.lrl.usace.army.mil/Missions/Regulatory.aspx>. All comments
