

PUBLIC NOTICE

Request for Information **Sleeping Bear Dunes**

The U.S. Army Corps of Engineers has reached a determination of No Department of Defense (DoD) Action Indicated (NDAI) and project closeout for the Sleeping Bear Dunes, Former Empire Air Force Station in Empire, Michigan. The property, also formerly known Empire Air Force Station and Air Force Station Z-34, was formerly used by the Air Force to protect nearby metropolitan areas, including Detroit and Chicago, from enemy bombers, and to provide assistance to commercial aviation.

Sleeping Bear Dunes is one of many former military installations throughout the United States that is reviewed under the Department of Defense's Munitions Response Site Prioritization Protocol (MRSP). This protocol is used to assess sites that may potentially have unexploded ordnance, discarded military munitions or munitions constituents, and to assign relative priorities for any additional investigation or removal actions that may be required.

The MRSP for Sleeping Bear Dunes states there is no known or suspected hazard for the NDAI, but the Corps is seeking information from the public that could affect prioritization decisions. The type of information we need includes types of munitions that were used, previous discoveries of munitions, and other historic knowledge of the property.

If you can provide information about the former Sleeping Bear Dunes, please contact:
