B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The proposed site shows no indication of aquatic resources within the provided boundaries. The site is situated in an urbanized metropolitan environment consisting of commercial and industrial structures. The overall project area is approximately 0.78 acres, is .623 mile straightline distance of the closest waterway and is in an area with minimal flood potential. Due to the lack of any observable aquatic features any activity, as it pertains to waters of the United States, would not be regulated; further the site is not subject to interstate or foreign commerce.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
