B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: Ephemeral Stream 2 was initially identified as isolated, but upon inspection of available mapping, aerial imagery, site photos depicting the specific area, and lack of any evidence of recent flows, it was determined to be an upland swale that loses any definition once it reaches the open field below.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
