¹ Map(s)/Figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide and included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12))⁴:

Exclusion Name	Exclusion Size	Exclusion ⁵	Rationale for Exclusion Determination
Ditch	40 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	The Ditch located between WET 2 and Bluegrass Parkway only contains surface water flowing or pooling in direct response to precipitation. This Ditch is a (b)(3) water and is therefore excluded from the rule.
Swale	300 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	The Swale located between WET 1 and WET 2 only contains surface water flowing or pooling in direct response to precipitation. This Swale is a (b)(3) water and is therefore excluded from the rule.
WET 1	0.602 acres	(b)(1) Non-adjacent wetland	WET 1 does not physically abut an (a)(1)-(a)(3) water and is not inundated by water from an (a)(1)-(a)(3) water in a typical year.
WET 2	0.082 acres	(b)(1) Non-adjacent wetland	WET 2 does not physically abut an (a)(1)-(a)(3) water and is not inundated by water from an (a)(1)-(a)(3) water in a typical year.
