I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): [8/27/2020](#)
 ORM Number: [LRL-2020-602-LCL](#)
 Associated JDs: [N/A](#)
 Review Area Location¹: State/Territory: [IN](#) City: [Lafayette](#) County/Parish/Borough: [Tippecanoe](#)
 Center Coordinates of Review Area: Latitude [40.3687](#) Longitude [-86.8121](#)

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: [Potential wetland areas were investigated by Alt & Witzig on May 12, 2020, and the delineation indicates wetland parameters are not present. A previous wetland delineation dated July 17, 2017, was also provided in which wetlands were identified on the site. However, analysis indicates that extremely wet conditions were present and was therefore not typical year conditions. Additionally, based on provided information and desktop review, it appears that a drainage tile was repaired on the site in 2018, within areas identified as wetland in the 2017 report. Therefore, the 2020 delineation appears to be accurate. There are no tributaries or waters of any kind on the site.](#)
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

season, conditions were wetter than normal. A total of 8.4 inches of precipitation was received in the preceding month, and almost 23 inches of precipitation in the preceding 3 months. For the May 2020 delineation, the analysis indicates normal conditions present during the wet season. Therefore, the 2020 delineation is considered typical year conditions.
