**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

<sup>1</sup> Map(s)/figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
Section I	0.31	acre(s)	(b)(1) Non-adjacent wetland.	Section I is located in an active farm field depression and is greater than 5,000 feet from the nearest potential (a)(2) water. The wetland does not meet the definition of adjacent wetlands per 33 CFR 328.3 (c)(i)(ii)(iii) or (iv) and is therefore excluded per 33 CFR 328.3(b)(1) as a non-adjacent wetland.
Section II	0.13	acre(s)	(b)(1) Non-adjacent wetland.	Section II is located in an active farm field depression and is greater than 5,000 feet from the nearest potential (a)(2) water. The wetland does not meet the definition of adjacent wetlands per 33 CFR 328.3 (c)(i)(ii)(iii) or (iv) and is therefore excluded per 33 CFR 328.3(b)(1) as a non-adjacent wetland.
Section III	0.09	acre(s)	(b)(1) Non-adjacent wetland.	Section III is located in a flow path within an active farm field that receives runoff from the site to the north. It discharges into a subsurface tile. Section III is greater than 4,000 feet from the nearest potential (a)(2) water. The wetland does not meet the definition of adjacent wetlands per 33 CFR 328.3 (c)(i)(ii)(iii) or (iv) and is therefore excluded per 33 CFR 328.3(b)(1) as a non-adjacent wetland.

**III. SUPPORTING INFORMATION**

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
