Public Notice No.
LRL-2014-617

Open Date:
13 May 2015

Close Date:
12 Jun 2015

Please address all comments and inquiries to:
U.S. Army Corps of Engineers, Louisville District
ATTN: Mr. Todd Williams CELRL-OPF-S
845 Sassafras Creek Road
Sassafras, KY 41759

Email: lrl.regulatorypubliccomment@usace.army.mil

Phone: 606-642-3446

This notice announces an application submitted for a Department of the Army (DA) Permit, subject to Section 404 of the Clean Water Act.

APPLICANT: Magoffin County Fiscal Court
P.O. Box 430
Salyersville, Kentucky 41465

AGENT: Qk4, Inc.
1046 East Chestnut Street
Louisville, Kentucky 40204

LOCATION: Adjacent emergent wetlands to an unnamed
tributary of the Licking River at Gullett in
Magoffin County, KY

Latitude: 37.740277°
Longitude: -83.127463°
7.5 Minute Quad: Krypton

PURPOSE: To construct an industrial development site.

DESCRIPTION OF WORK: The applicant proposes to discharge approximately 377,000 cubic yards of fill material to construct an industrial park on an undeveloped 20.03 acre site. The proposed site contains approximately 5.6 acres of emergent wetlands. The fill material would be provided from the adjacent Mountain Parkway Expansion project.

AVOIDANCE, MINIMIZATION, AND MITIGATION MEASURES: The applicant was able to avoid 1.7 acres of wetlands by reducing the size of the development site from 25.2 acres to 20.2 acres. The applicant has indicated that they cannot avoid any more wetlands in the project area and still be able to construct the proposed industrial park.

The applicant proposes to compensate for unavoidable impacts by purchasing in-lieu fee credits from the Kentucky Department of Fish and Wildlife Resources Stream and Wetland Mitigation Fund. A total of 13.44 AMUs would be purchased.

Operations Division
Regulatory Branch (South)
Public Notice No. LRL-2014-617

It is noted that this proposed mitigation plan is open to comment and subject to change. The Corps will make a determination of appropriate mitigation, upon review of all submitted information.

REVIEW PROCEDURES: A DA Permit cannot be issued if any legally required Federal, State, or local authorization or certification is denied. A DA permit, if otherwise warranted, will not be issued until a State of Kentucky Water Quality Certification or waiver is on file at this office. In order to comply with Section 401 of the Clean Water Act, the applicant must apply for State certification from the Kentucky Energy and Environment Cabinet Division of Water (KDOW).

Copies of this notice are sent to the appropriate Federal and State Fish and Wildlife Agencies. Their views and comments are solicited in Accordance with the Fish and Wildlife Coordination Act of 1956. Based on available information, the proposed activity will not destroy or endanger any Federally-listed threatened or endangered species or their critical habitats, as identified under the Endangered Species Act, and therefore, initiation of formal consultation procedures with the U.S. Fish and Wildlife Service is not planned at this time.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. A request for a public hearing must state the specific interest which might be damaged by issuance of the DA Permit.

The National Register of Historic Places has been examined, and it has been determined that there are no properties currently listed on the Register which would be directly affected by the proposed work. If we are made aware, as a result of comments received in response to this notice, or by other means, of specific archaeological, scientific, prehistorical, or historical sites or structures which might be affected by the proposed work, the District Engineer will immediately take the appropriate action necessary pursuant to the National Historic Preservation Act of 1966 - Public Law 89-665 as amended (including Public Law 96-515).

The decision whether to issue a permit will be based on an evaluation of the probable impact of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered; among those are conservation, economics, aesthetic values, general environmental concerns, historic values, fish and wildlife values, flood damage prevention, land use, navigation, recreation, water supply, water quality, energy needs, safety, food production, and in general, the needs and welfare of the public. In addition, the evaluation of the

Regulatory Branch (South)
Public Notice No. LRL-2014-617

impact of the activity on the public interest will include application of the guidelines (40 CFR Part 230) promulgated by the Administrator, United States Environmental Protection Agency, under authority of Section 404(b) of the CWA.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. It is presumed that all interested parties and agencies will wish to respond; therefore, a lack of response will be interpreted as meaning that there is no objection to the proposed project. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Written statements received in this office on or before the closing date will become a part of the official record and will be considered in the determination on this permit request. Any objections which are received during this period will be forwarded to the applicant for possible resolution before the determination is made whether to issue or deny the requested DA Permit. A permit will be granted unless its issuance is found to be contrary to the public interest.

Information pertaining to this application is available for public examination during normal business hours upon prior request. Drawings are available on Louisville District's Internet site at <http://www.lrl.usace.army.mil/Missions/Regulatory.aspx>. All comments regarding this proposal should be addressed to Mr. Todd Williams; CELRL-OPF-S at the address noted above and should refer to the Public Notice Number LRL-2014-617.

If you desire to submit your comments by email, you must comply with the following:

a) In the subject line of your email, type in ONLY the Public Notice ID No. LRL-2014-617.

Example:

Subject: LRL-2014-617

b) Provide your physical mailing address and telephone number.

c) Send your email to: lrl.regulatorypubliccomment@usace.army.mil.
